Recorded Future	Vattenfall
RISE	Vinnova
SNUS (Swedish Network Users Society)	

Main report in October 2022

Four themes:

- Cybersecurity undervalued strategic factor for competitiveness
- Sweden is not adequately equipped to meet cyber threats
- Other countries work more efficiently than Sweden
- Five key areas and nine proposals

More about the project and download the report: https://www.iva.se/projekt/cybersakerhet-for-okad-konkurrenskraft/

Proposals in five key areas

1. Improving governance at the national level

2. Improving the exchange and use of information

3. Strengthen the operational capacity of organisations

4. Joining forces on skills provision

5. Mobilising resources
